

***NEW Initiative for the
Christina Watersheds Municipal Partnership (CWMP):
The CWMP Technical Assistance Group (TAG)***

The CWMP TAG is available to provide guidance on water resource related issues, including stormwater management, water quality improvement, sustainable land use planning, environmental regulatory compliance, land preservation, and project coordination and funding. The group includes CWMP-affiliated experts who lend their time and expertise in an advisory capacity with costs covered by CWMP.

One-hour time slots are offered on a first come, first served basis to those communities and select entities that complete a brief, one-page online request form (see <https://tinyurl.com/CWMP-TAG-Form> for a full description of the program and eligibility).

For more information, applicants and/or interested entities may contact Brian Winslow at:
bwinslow@brandywineredclay.org
610-793-1090 ext. 103.
